

How to use KU Article Linker

Navigating to full-text articles from Databases

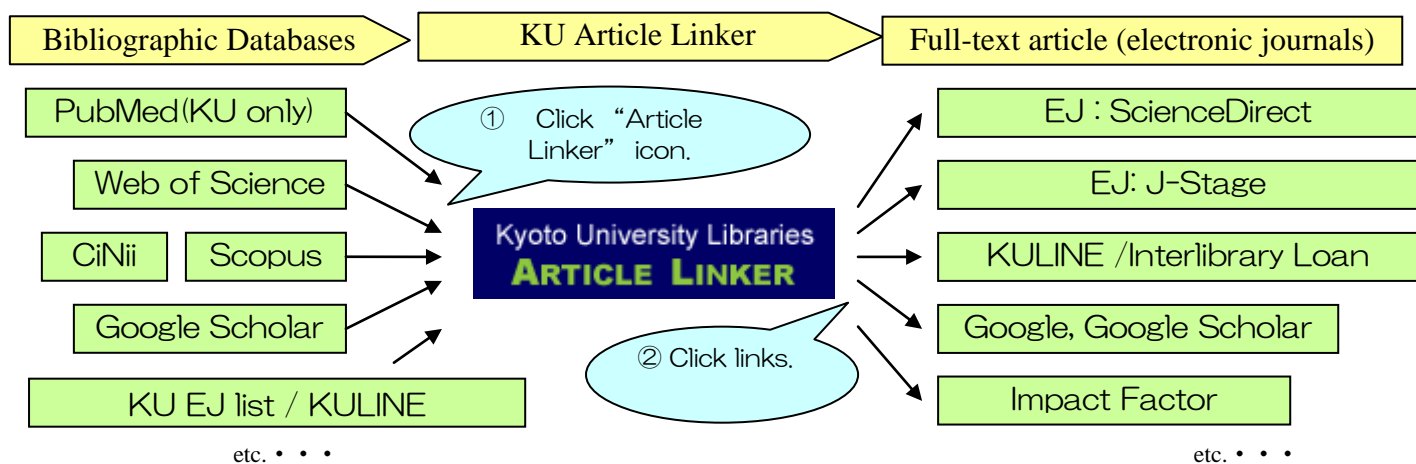

What is KU Article Linker ?

I found an interesting article in the bibliographic database. How can I get the full-text?

In such a case, let's try KU Article Linker !!

KU Article Linker is an open URL link-resolver, which navigates a full-text article from search results of library bibliographic databases. Clicking "KU Article Linker" icon found on search results of bibliographic databases, then you can reach a window which connects to licensed electronic journals or full-texts will be displayed. Using this window, you can get easily full-text articles or locate journals.

How to use KU Article Linker?

It is possible to use KU Article Linker in the following two cases.

① From search results of Databases.

- When searching a bibliographic database, icons such as , , or a text-link such as "[Full-Text@KyotoUniv.](#)" will be displayed on the search result.
- Clicking these icons, the "KU Article Linker window" will be brought up. "KU Article Linker window" includes bibliographic information of articles and a link to the full-text.
 - When it is possible to access articles via electronic journals, under the "Full-text via Online" section, the **Article** icon will be displayed. Click this icon and obtain the article.
 - When it is not possible to access articles via electronic journals, "Full-text via Online is not found". In this case, click a link to "KULINE" and search the library catalog to see if Kyoto university libraries have a printed copy of the journal. If Kyoto university libraries do not have the journal for the year you need, then you can request the library to obtain a copy of the article by interlibrary loan. Moreover, it may be possible to search for articles by clicking links to "PubMed" or "Google".

② From Electronic Journal List / KULINE

- When searching by **DOI or PubMed ID Number** in the E-Journals List, "KU Article Linker window" will be brought up. Also, when searching journals by KULINE, icon will be displayed on the right-hand side of ISSN. Click this icon and "Article Linker window" will be displayed.

KU Article Linker window

The screenshot shows the '京都大学図書館 Article Linker' interface. It displays search results for an article titled 'Induction of pluripotent stem cells from fibroblast cultures' by Takahashi, Kazutoshi. The interface is divided into several sections:
